

Proposal for the School's 50th Anniversary Celebration

Suggestion (Please state your suggestion, giving details of the event.)

A careers fair is a simple and interesting way of gaining everyone's attention. It is a helpful event for those who still don't have a good idea of what they would like to do in the future. Students can ask questions about the fields they are intrigued by. It is not only an informative event but also an educational one because students will learn about what steps they need to take in order to achieve their goals.

Desired benefits (How would this event benefit the school and/or the community?)

The desired benefits would be that students are left feeling hungry for success and, thus, would be motivated to work harder for their goals. This can benefit the school by showing the public that schools can assist their children step by step in choosing the right career path for them with the

help of the tools and mentors provided by the school. The people behind local success stories can come and talk to students about how they made it in the field of work they decided to venture into.

Planning (What steps are needed?)

A variety of people from different fields of work such as make-up artists, bus drivers, engineers and so on need to be found. Then a big venue is needed so that everyone has their own mini booth and space. The careers fair can be promoted by distributing flyers to students.
